

HUMAN PERSPECTIVES ON INCLUSIVE PUBLISHING

Stockholm May 16th–18th 2016

PROGRAMME

Welcome to Take Part 2016

– the International Conference in Stockholm about inclusive publishing for users, providers, producers and distributors. We welcome delegates from around the world to exchange experience and knowledge about the human perspectives on inclusive publishing. Take Part, you too!

Roland Esaïasson
Director General
Swedish Agency for Accessible Media

Jesper Klein
Chair of the Board
DAISY Consortium

Elin Nord
Chair of the Swedish DAISY
Consortium

Niclas Lindberg
Secretary General of the
Swedish Library Association

Svensk
biblioteksförening

BLOCK 1 11:20-12:00

KEYNOTE: Tzviya Siegman

Digital Book Standards & Capabilities Lead,
Wiley and Sons

The labor pains of born accessible

Creating workflows for born-accessible content presents both technical and cultural challenges. XML and HTML can lay the groundwork for an accessible tool chain, but much more is needed to make content accessible. I will discuss my work on bringing born-accessible content and platforms to Wiley. I'll cover some existing accessibility-testing tools, and focus on the human factors in publishing accessible content. Let's make sure our tools, platforms, and content work for everyone.

BLOCK 2 15:10-15:40

SEMINAR: Inge de Mönnink

Manager Educational Services & Strategic
Innovation, Dedicon

**Creating accessible content elements
in the publishing workflow**

How can you raise awareness for accessibility in an educational publishing company? And how can you adjust the publishing workflow in a way to suit every learner? How can vendors successfully collaborate with publishers in creating an accessible digital reading experience? Inge de Mönnink will stretch those question marks and provide you with a real case study of how Dedicon and ThiemeMeulenhoff (TM) are collaborating in order to overcome these obstacles and create innovation.

BLOCK 1 12:00-12:30

SEMINAR: Robert "Tripp" Naurup

Global Archive Manager, Elsevier

**The faces behind Elsevier's
accessibility approach**

"Even in large companies, it is individuals who make the difference when it comes to accessibility." Over the last 15 years, Elsevier's approach to accessibility has been driven by a handful of individuals whose experiences with real people in the real world facing real challenges. This approach has resulted in the policies and processes the company uses today. Robert Naurup will take you on Elsevier journey towards inclusion and provide you with best practice of how you can include accessibility within your business, despite company size.

BLOCK 2 14:40-15:10

SEMINAR: Steve Tyler

Mainstream & Specialist

**Reading Services – A Personal
& Professional Perspective**

A talk on some of the specialist and mainstream reading services, the opportunities afforded by each of them and a perspective on future developments and the role of specialist provision. The working context is that of current UK provision.

BLOCK 3 16:10-16:40

SEMINAR: **Dave Gunn**

Accessibility Consultant, Outervations

Access in self-publishing: Findings from the new WIPO and IAF guidance

Current estimates indicate that 75 percent of e-book sales are of self-published work, where most of the large e-book retailers are now offering routes for authors to self-publish. This new method of publishing has until recently been neglected in terms of accessibility advice. Dave Gunn will highlight the current complexity of accessibility issues concerning self-publishing and provide you with a new accessibility guidance that aim to help authors solve these problems. It is the World Intellectual Property Organization (WIPO) and the Accessible Books Consortium that stand behind these guides.

BLOCK 2 14:00-14:40

KEYNOTE: **Yong-Sang Cho**

Principal researcher, Korea Education & Research Information Service (KERIS)

Modeling digital textbook influence to EDUPUB and harmonization with accessibility

International consortia have developed convergence standards, titled EDUPUB, between digital publishing and learning technologies for educational digital book enforced using multimedia and interaction with users. Digital textbook led by Ministry of Education in Korea has adopted digital publishing technology from 2011, and the digital textbook has shown enriched user experiences and advanced user interfaces. The digital textbook influenced the EDUPUB project as well. To reach inclusive service for the digital textbook emerging technologies need to pursue balance with accessibility. Global Public Inclusive Infrastructure (GPII) is under consideration as a potential approach for the accessibility relates to emerging technologies.

BLOCK 3 16:40-17:10

SEMINAR: **Fredrik Schill and Jens Halvarsson**

COO and CMO, Textalk AB

Redefine Accessibility – Why we need to rethink the meaning of accessibility

In order to convince publishers to take part in projects for accessibility, it is essential to show a gain for their entire audience. With this in mind, there is a need to redefine the meaning of accessibility and rather talk about how to help newspapers improve their existing services. One must show how the cost of including accessibility can create revenue for the publisher. The argument cannot just be stated, it must be proven by actual products. Fredrik Schill and Jens Halvarsson will prove how including accessibility can be profitable by demonstrating research and analysis undertaken to meet the needs of accessible newspapers and give you an overview of innovations that have emerged from this research.

KEYNOTE: **Micah May**

Director of Business Development,
New York City Public library

The future of libraries and e-books: Serving our users in the 21st century

E-content, now audio not e-books, is the fastest growing area of circulation for libraries and getting e-content service right is clearly essential. Since 2012, when he helped found ReadersFirst, and was awarded a federal grant to build a better open source e-book app and forged groundbreaking deals with major publishers, Micah has been helping lead the charge to improve library e-book service including by taking ownership of the channels for delivery and developing better offerings that deliver satisfying user experiences, value for libraries (ROI)

BLOCK 1 11:20-12:00

offerings that and are consistent with core library values. Micah will discuss how libraries can take advantage of and participate in two major grant funded projects supported by the IMLS, Library Simplified or SimplyE and the Library Econtent Access Project (LEAP), part of an emerging digital platform for e-content service.

BLOCK 2 14:00-14:40

KEYNOTE: **Michael Wright**

Director, NOTA

If accessibility is the step, capture is the king

We do not provide accessible information only in order to make information accessible. We do it in order to leverage everyday life of people with print disabilities. Thus, we must ensure that what we have on the shelves are perceived attractive by the users. Second, we need to collect knowledge about the (potential) users, their behavior and preferences. Then we have to reach out and convince them to join us. And to stay as active users. Nota has been on a travel from 13.000 to more than 100.000 users, from elderly to youngsters, from vision impaired persons to dyslexics and welcoming close to 15.000 teachers. How did we do that, where did we succeed and where did we fail. From smart cartoons through strategic marketing. From provision to involvement.

SEMINAR:
Dipendra Manocha

Director of the
Regional Re-
source Centre,
DAISY Forum
India

BLOCK 3 16:40-17:10

Building suitable inclusive publishing ecosystems for developing countries

The infrastructure for providing accessible books is very different in high and low income countries. The target age group of users, their requirements and skill set too are different. Technology gaps, affordability and local language issues need to be addressed to provide usable solutions. Besides these challenges, changes in publishing and reading work flows are to be managed. This session will reflect on the work of development agencies over the last few years providing accessible books in developing countries. We will share examples where effective solutions are provided, and draw lessons that can be replicated in many other countries.

SEMINAR:
Ulla Bohman
 Acting
 Communications
 Manager, Swedish
 Agency for Accessible Media

BLOCK 1 12:00-12:30

with different reading materials and easy-to-read to reach the readers who otherwise do not have the possibility to take part of books, news or information.

Reaching the unreachable

Best practice how to use a network of reading ambassadors in combination

BLOCK 2 15:10-15:40

SEMINAR:

Misako Nomura and Hiroshi Kawamura

Director of Information Center, Japanese Society for Rehabilitation of Persons with Disabilities and Vice President, Assistive Technology Development Organization

BLOCK 2 14:40-15:10

SEMINAR:

Leena Holopainen and Minna Katela

Pedagogical Planner and Information Specialist, Celia

Engaging children and adolescents in finding the joy of reading

How can we connect with our target group on several occasions during their daily life? Leena Holopainen and Minna Katela will show how Celia is integrating different communication channels with the intention to inspire their target group to become active users of Celia's talking books. They will provide you with best practice of how you can encourage active reading participation through social network and get your target audience to read and share more. They will also highlight the importance of establish an effective collaboration with public libraries and teachers, who have a key role in activating children and adolescents to read.

A user's voice: "I can read and understand the textbooks with DAISY!"

Challenges to reach out to users with reading disabilities in Japan. The seminar gives you an insight of how Japan produces and provides school textbooks in DAISY multimedia format for children and pupils at the elementary and junior high school. Misako Nomura and Hiroshi Kawamura will reflect on the achievements Japan has accomplished and the challenges the country now is facing. You will learn about the effectiveness of text book in DAISY multimedia format and get an exclusive insight in their future strategies.

BLOCK 3 16:10-16:40

SEMINAR: **Monica Halil Lövblad**

Project Leader, The Accessible Books Consortium

Bringing books to persons with print disabilities

The Accessible Books Consortium (ABC) have a global role in improving the availability of books for visually impaired, in developing countries in particular. Monica Halil Lövblad will tell you, on a practical level, how ABC implement the objectives of the Marrakesh Treaty. She will present real cases showing how their work increase the accessibility within countries. You will also learn how your organization can cooperate with ABC in purpose of increasing the accessibility of books within your country.

Tuesday May 17 Vendor showcase: Latest developments in accessible reading systems

We have invited global manufacturers of accessible reading systems to present their latest developments. Approximately 10 companies will present their products for 10 minutes each. If you are interested in apps, online DAISY-players and text-to-speech applications, this is a session for you.

Humanware	Dolphin Computer Access	Textalk
Plestalk	Solutions Radio	Acapela
Bones	Pyxima	<i>and more to come!</i>
Pratsam	KNFB Reader	

Tuesday/Wednesday May 17-18 Take Part exhibition

Meet publishers and manufacturers of assistive technology from all over the world at the Take Part exhibition. The exhibition represents a unique and great opportunity to network and develop new relationships. Get an insight in the latest developments and take the chance to learn from some of the best product developers of accessible reading systems. Meet publishers working with inclusive publishing and e-book production and vendors working with web accessibility.

»In the Information Age, access to information is a fundamental human right.«

GEORGE KERSCHER | DAISY Consortium, IDPF

BLOCK 1 10:40-11:20

Keynote: George Kerscher

Chief Innovation Officer DAISY Consortium, Senior Officer, Accessible Technology Learning Ally, President IDPF

Beyond print and into what imagination will bring

The digital publishing revolution is changing everything, and The Google Impact Challenge comes at a perfect time to make sure the text of publications is fully accessible! It is also perfectly clear that we need to go far, far beyond the text and deliver access to graphical materials, but what is that strategy and who are our partners? Looking further ahead, what is the role of standards and how do we integrate and influence all the glorious innovations that digital publishing will bring, and make sure the blind and print disabled community can Take Part?

BLOCK 1 11:20-11:50

Seminar: Cristina Mussinelli

Secretary General, LIA foundation (Italian Accessible Books)

LIA – an Italian inclusive publishing ecosystem

E-books and digital technologies offer extraordinary opportunities to extend and ease the possibility of reading to a number of people that suffer from different kinds of visual impairment. However a coordinated effort is needed by all parties involved to fully exploit this potential. E-books, distribution channels, payment tools, reading solutions (both hardware and software) should embed accessibility in a homogeneous way. Ms Mussinelli will describe the successful LIA model and its inclusive publishing ecosystem carried out by the LIA Foundation.

BLOCK 1 11:50-12:20

Seminar: Brad Turner

Vice President of Global Literacy, Benetech,

Accessibility progress? YES!

The challenge of making new digital content born accessible, and accessible all the way to the end user, requires partnerships and technological innovation. In 2015, Benetech set a goal to influence 15 publishers and their partners to make positive steps toward born accessible by producing more accessible materials in 2016. Through its DIA-GRAM Center and Born Accessible initiatives, Benetech develops standards, guidelines, and technology tools to make it easier to create, discover, use, and interact with accessible content, including images, graphics, and math, building on its vast experience running Bookshare, the world's largest accessible library. This session will highlight the 15 companies Benetech worked with and describe the steps they took toward making their materials in an accessible manner.

BLOCK 2 13:50-14:30

KEYNOTE: Victoria Owen

Head Librarian at the University of Toronto Scarborough and Governing Board member of the International Federation of Library Associations and Institutions (IFLA)

E-books, the potential for inclusion

What is the impact on accessibility and usability as libraries move from print to digital collections? How are legislators, publishers and librarians shaping access in the digital era? The global perspective on e-books, the inclusion of people with disabilities in libraries, and the status of copyright legislation for libraries will be highlighted. The presentation will weave together these various strands of the e-book ecosystem starting with the policy framework, national policies and laws and how they are incorporated into the reality of the digital environment. Can 'born digital' mean 'born accessible' within the next 10 years?

BLOCK 2 15:00-15:30

SEMINAR: Avneesh Singh

Chief Operating Officer, DAISY Consortium and representatives of Benetech, NORDIC group and Learning Ally.

Transition to EPUB 3 made possible

Accessible EPUB 3 standard promises a revolution in inclusive publishing and reading, bringing great advancements for print-disabled and new opportunities for DAISY members! At the same time, it brings a paradigm shift in the way members produce accessible content and the way print-disabled readers consume published information, making transition to EPUB 3 a non-trivial process. Moreover, the diversity in worldwide membership necessitates different approaches for transition. The presentation will touch upon the main bottlenecks faced by DAISY members in transition to EPUB 3, thereafter the members will present the case studies, demonstrating their successful transition. The early movers will share the approaches for migrating their diverse production processes, distribution, and supported reading systems to EPUB 3.

BLOCK 2 14:30-15:00

SEMINAR: Cyril Labordrie

Technical Evangelist, EDRLab

**EDRLab, the IDPF and Readium Foundation headquarter**

IDPF and Readium have decided to extend their operations in Europe, European Digital Reading Lab has then been created. European Digital Reading Lab is a non-profit organization based in Paris and it is a new innovative initiative in the Open Source Digital Publishing area. The EDRLab organization will be described in this presentation. EDRLab is open to any company in Europe whose goals are related to digital publishing. EDRLab is funded by the government, being a part of this organization let companies participate in the organization strategy. The DRM LCP, which is one of the first EDRLab task, will be explained during the presentation.

BLOCK 1 10:30-11:20**KEYNOTE: Rick Johnson**

Vice President of Product Strategy and Founder, Vital-Source Technologies, Inc.

Accessible reading on mainstream e-book book platforms

The next generation of digital learning will bear little resemblance to the educational systems that current generations used in their formative years. We have all seen the traditional vehicles for delivering content migrate from paper, to representations of paper on the screen, and the subsequent struggles that educators have had in insuring accessibility. Tomorrows learning content will be built from a confederation of systems working together, personalized for the user, and adhering to standards that allow it to be born digital, and born accessible from its creation. What is possible to deliver into the hands of today's learners and readers will be discussed in this session.

11:50-12:20 **BLOCK 1****SEMINAR: Oskar Laurin**

Acting Manager Digital Library, City of Stockholm Libraries

Bibblix – a reading app for kids

Bibblix is a book recommendations and reading app for children ages 6-12, developed by the Stockholm public library and Malmö public library. The main objective of the project is inclusion of users whom for various reasons feel hesitant towards books and reading. These users, although a heterogeneous group, show a number of common traits that are important to understand when creating relevant services for them. A wish to use the same services as more avid readers and a dislike for products too apparently aimed at them being two examples of this. Bibblix is sponsored by the Swedish Arts Council.

BLOCK 1 11:20-11:50**SEMINAR: Richard Orme**

Chief Executive Officer, DAISY Consortium

Reading apps and accessibility – user requirements and helpful guidance

Increasingly publishers are creating titles with content that is accessible to more people with different accessibility needs. But what about the apps that are used to read all these wonderful books, journals and documents? This presentation will describe the features needed by readers with different print impairments, and explain the methodology that is being used to test apps available today. The publicly available evaluation results help individuals and institutions make choices about reading systems, and inform developers about what improvements will help them to reach more markets. Lastly, you will learn how you can participate in this important effort.

BLOCK 2 14:30-15:00

SEMINAR: Susanne Axner

Manager Research and Development, Swedish Agency for Accessible Media

Multiple services through DAISY online

The Swedish Agency for Accessible Media (MTM) has seen years of successful take up of users of the on-line library service Legimus – forecasted to surpass a million digital loans 2016. The most popular distribution channel for talking books in Sweden, is now the iOS and Android app Legimus. MTM is continuously extending the services. Since 2013 delivering talking newspapers, and from 2016 books and community information via the DAISY on-line protocol. However, it is an enormous challenge to serve the less IT-savvy audience, often elderly and blind users via online. It requires not only new, improved technologies, but also communication strategies and marketing, organizational and policy changes, and, in the long run, perhaps even new legislation.

BLOCK 2 13:50-14:30

SEMINAR: Andrew Furlong

Technology Support Manager,
Vision Australia

It's a small world: Opportunities and Solutions for Accessible Online Information Services

We live in a connected world in which people have increasing choice and control over the ways in which information can be accessed. When providing such a service, a person-centered approach is needed so that people who have a print disability are empowered when accessing the growing amount of online content. The ubiquitous nature of the internet and the exponential growth in mobile technologies creates opportunities to serve the characteristics and needs of different client groups. The transition to an online world also brings new challenges. This presentation will provide a practical overview of the initiatives being adopted by Vision Australia and others around the world to address these challenges and meet the diverse information needs of people who have a print disability.

15:00-15:30 BLOCK 2

SEMINAR: Dominic Labbé

Blindness Product Development Director, HumanWare Group

Online DAISY Players – a painless transition path to the post CD online age of reading

This presentation will present that transition in delivering accessible content to readers. Humanware in conjunction with worldwide libraries has long worked to provide solutions for those needing assistance in reading printed texts. Our customers now have the power of reading, not just for pleasure but to inform, educate and advance their studies and careers. In 1998 we succeeded in transitioning from cassette to cd. Once again technology is driving the next transition this time to online content. Our joint responsibility as stakeholders in accessible media is to include our readers using dedicated players in the shift to online content.

BLOCK 1 10:40-11:20

SEMINAR: **Gjergj Demiraj**
Deputy CEO, Gutenberg Technologies

Authoring for creating rich and accessible content

Authoring tools have been one of the most critical tools for enabling publishers to easily create, enrich and publish on all distribution channels. But accessibility is not always taken in consideration, neither from the publisher nor from the authoring tool provider. What features an authoring tool must provide for creating accessible content? What are the best practices for creating accessible content in modern authoring tools?

BLOCK 2 11:50-12:30

SEMINAR: **Tatsuo Nishizawa**
Chief Engineer, Shinano Kenshi Corporation

EPUB 3 producer at school

For learning disabled students, demand of accessible educational materials is increasing rapidly. Text books are converted to DAISY/EPUB3 and distributed to the students, however they still need other educational materials such as supplementary text books, drills or test papers in accessible formats. Teachers who support the students should convert such printed materials to EPUB3, but they are busy and time is very limited to produce. An EPUB3 production software have been developed to meet this need and Tatsuo Nishizawa will present how the software simplify the production of accessible materials for teachers.

SEMINAR: **Sebastien Dubuis**
Managing Director and founder, Publiwide

11:20-11:50 BLOCK 1

Authoring, editing, personalizing e-books: all the value of the EPUB 3 format

The EPUB 3 format is the portable version of HTML 5 language. It has taken us a few years to discover how well to manage the format and develop the right platforms to take advantage of it. We will present you two online platforms that are aimed at instructors, professors and teachers. The first toolset have been designed to personalize existing e-books with math formulas, images, video and audio tracks. The second tool provides a broader spectrum of functionalities to author, edit, enrich and manage EPUB 3 files. in the browser.

13:50-14:30 **BLOCK 2**

SEMINAR: **Rick Johnson**

Vice President of Product Strategy and Founder, Vital-Source Technologies, Inc.

VitalSource Content studio

VitalSource Content Studio (VCS) delivers a comprehensive set of content tools by combining a cloud-based digital content authoring tool that enables subject matter experts to author and produce digital-first content that is responsive, interactive, and accessible, with powerful customization capabilities. It is a flexible model in which authors can mix and match content types into single pages, the tool outputs EPUB 3 format content directly into our reading system, Bookshelf.

BLOCK 2 14:30-15:00

SEMINAR: **Niclas Bergström**
Founder & CEO, ReadSpeaker AB

Automatic production and embedding of speech in EPUB 3

This presentation will demonstrate how high quality text-to-speech (TTS) can be used to narrate EPUB3 books automatically as well as how cloud based TTS can be used to offer streaming solution to speak out the textual content in EPUB's. You will learn how easy and quick it can be to make a book talk. This presentation targets anyone interested in the latest in speech technology and speech enabling of book content.

15:00-15:30 **BLOCK 2**

SEMINAR: **Aditya Bikkani**

Business Development, AEL Data Service LLP

Leveraging the power of EPUB 3

EPUB 3.0 is the latest revision of the industry-standard XML e-book format, merging into modern web technology using HTML5, CSS3 and the Java-script frameworks transforming the EPUB into an interactive format. It focuses on XML-driven formats by demanding XHTML serialization and including additional XML vocabularies, such as MathML and SVG.
